CIPRM Coherent InGaAs PIN balanced receiver module

In the CIPRM balanced optical receiver Excelitas has the best features of high-performance InGaAs photodiodes and a lownoise, high-gain transimpedance amplifier to offer a practical solution to detect small changes above the interfering noise floor of an incoming signal. The advantage is that the common optical noise is cancelled out.

This receiver incorporates two low-noise photodiodes with wellmatched responsivity, in order to ensure a high common mode rejection ratio (CMRR). It has two optical inputs (single mode fiber pigtails in the -110 model and FC receptacles in the -210 model), an RF output, electrical supply inputs and two photocurrent monitor outputs.

The CIPRM modules come in a robust casing with flange mounting holes for securing the module to working surfaces or platforms. Combined with a wide operating temperature range, and excellent EMI characteristics, the CIPRM can work in some of the toughest and harshest environments.

Excelitas' series of optical balanced receiver modules are designed and built to be fully compliant with the European Union's RoHS Directive 2015/863/EU.

Key Features

- Spectral range 800 1650nm
- 200MHz bandwidth
- High performance InGaAs photodiodes and TIA
- Matched responsivity
- Photo-current monitor outputs
- Rugged and Robust
- RoHS compliant
- Enhanced EMC/EMI performance

Applications

- Wind LiDAR
- FMCW LiDAR
- Optical coherent tomography
- Heterodyne Detection
- Spectroscopy
- Optical delay measurement
- Ellipsometry
- Ultra low signal detection

Table 1: receiver specifications @ Tcase = 22 °C, into a 50Ω load, unless otherwise specified

| Parameter | Typical specification | Notes |
|--------------------------------------|--|---|
| Wavelength Range | 800-1700nm | |
| Detector Material | InGaAs | |
| Detector Diameter | 0.1mm | |
| Detector Responsivity (Peak) | 0.95 (A/W) | @1550nm |
| Optical Input | FC/APC | For -110, SM fiber, 9/125 with 900µm buffer |
| Saturation Optical Power | 200µW | CW or average power on one detector, (unbalanced) |
| | 10mW | When average power is the same on both detectors (balanced) |
| Maximum Input Range | 0.35mW | Differential signal |
| | 10mW | Absolute maximum, differential signal |
| Integrated noise | 100nW | NEP*√BW (at input) |
| Photo-current Monitoring Coefficient | 2.85V/mW | |
| Transimpedance Gain | 32x10 ³ V/A | |
| Conversion Gain, Maximum | 30×10 ³ V/W | |
| Bandwidth (-3 dB) | 2.5kHz - 200MHz | |
| Rise Time | 2ns | |
| Common Mode Rejection | 30dB | |
| NEP | 7 pW/vHz | Calculated |
| Overall output voltage noise | 4mVrms | Measured |
| Output Impedance | 50Ω | |
| Output Connector | SMA | |
| Maximum RF Power | +11dBm in 50Ω | |
| Power Supply Requirements | ±12V DC | Supply voltage |
| | I _{+12V} =32mA I _{-12V} = 5mA | Supply current |

Table 2: Ordering Guide

| Part Number | Description |
|-------------|---|
| CIPRM-110 | Fiber pigtailed module, 1 meter single mode fiber |
| CIPRM-210 | FC receptacle module |
| 1342-2 | Shielded power cable |

RoHS Compliance

The CIPRM balanced receiver module is designed and built to be fully compliant with the European Union Directive 2015/863/EU – Restriction of the use of certain Hazardous Substances (RoHS) in Electrical and Electronic equipment.

About Excelitas Technologies

Excelitas Technologies is a global technology leader focused on delivering innovative, customized solutions to meet the lighting, detection and other high-performance technology needs of OEM customers.

From analytical instrumentation to clinical diagnostics, medical, industrial, safety and security, and aerospace and defense applications, Excelitas Technologies is committed to enabling our customers' success in their specialty end-markets. Excelitas Technologies has approximately 5,000 employees in North America, Europe and Asia, serving customers across the world.
