DC Power Relays (200-A Models)

DC Power Relays Capable of Interrupting High-voltage, High-current Loads

- A compact relay (98 x 44 x 86.7 mm (L x W x H)) capable of switching 400-V 200-A DC loads. (Capable of interrupting 1,000 A at 400 VDC max.)
- The switching section and driving section are gas-injected and hermetically sealed, allowing these compact relays to interrupt high-capacity loads. The sealed construction also requires no arc space, saves space, and helps ensure safe applications.
- Downsizing and optimum design allow no restrictions on the mounting direction.
- Terminal Cover is also available for industrial applications.
- UL/CSA standard UL508 approved.

RoHS Compliant

■Engineering Data

G9EC-1-B) Switching/Current Conduction Models

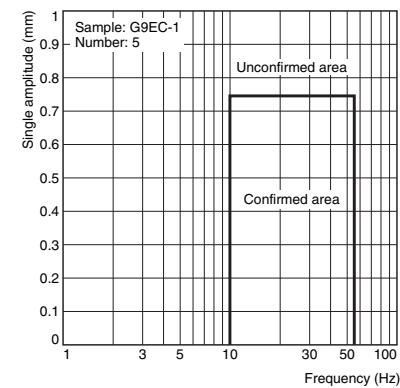

●Maximum Switching Capacity

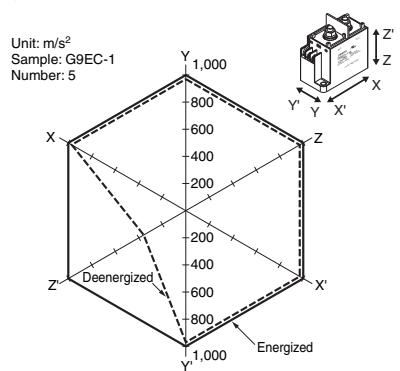

●Carry Current vs Energizing Time

●Vibration Malfunction

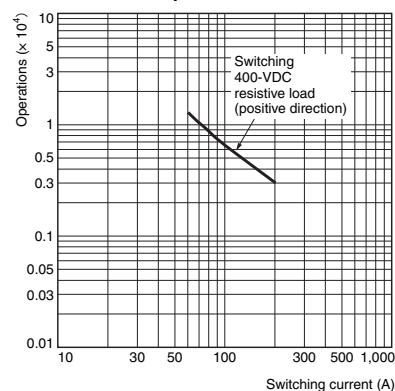

●Shock Malfunction

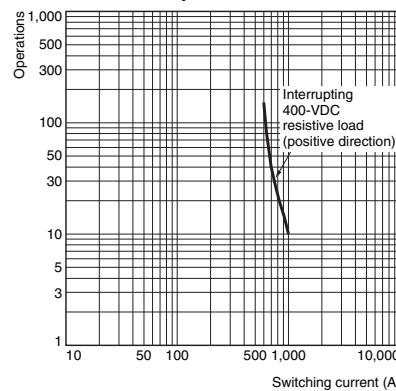

The value at which malfunction occurred was measured after applying shock to the test piece 3 times each in 6 directions along 3 axes.

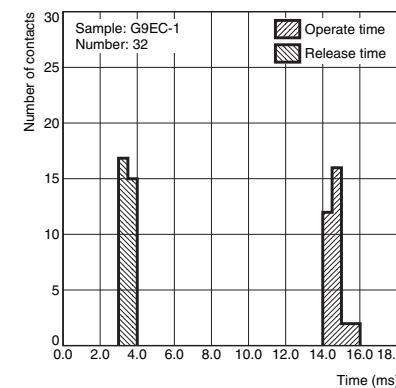

●Electrical Endurance (Switching Performance)

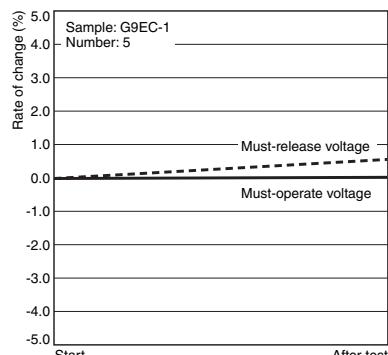

●Electrical Endurance (Interruption Performance)

●Time Characteristic Distributions

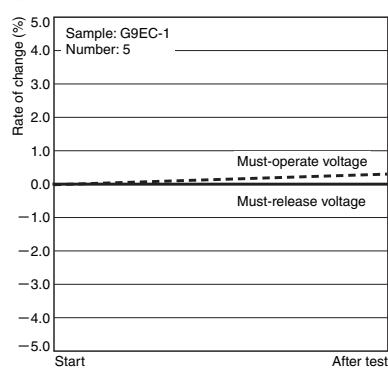

●Vibration Resistance

Characteristics were measured after applying vibration at a frequency of 10 to 55 Hz (single amplitude of 0.75 mm) to the test piece (not energized) for 2 hours each in 3 directions. The percentage rate of change is the average value for all of the samples.

●Shock Resistance

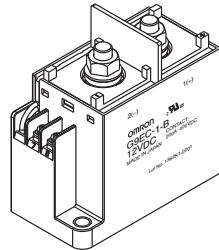

Characteristics were measured after applying a shock of 490 m/s² to the test piece 3 times each in 6 directions along 3 axes. The percentage rate of change is the average value for all of the samples.
